Chief, Records Management Division

Comment on Proposed Regulation on Disposition and Transfer
of Records for Proprietary Projects

1. The attached proposed regulation on proprietary projects was handed to me today by Chief, Regulations Control Staff. Will you please review this proposed regulation and let me have your comment on it by 23 March.

25X1

2. If you determine it necessary to discuss the proposed regulation with anyone in the Office of the Comptroller, do so on an informal basis because this is not a request from the Regulations Control Staff for formal concurrence at this time. I also suggest that you compare this item with the proposed records control schedule that was submitted to this office some time ago by Miss Moore.

3. There is quite a lengthy history surrounding this particular type of record, i.e., proprietary projects. For that reason, the proposed regulation in its present form represents some progress.
